A student can choose courses according to his/ her interest. There is a provision to aid the slow and fast learners. Slow learners may choose to drop courses and complete the programme of study at a later date. For example a student of the B.Sc Physics programme can take lesser number of courses in one or more courses and complete them at subsequent semesters. But the student has to complete the programme within N+2 years where N denotes the duration of the programme. In the case of a three year programme the student has to complete the programme within 5 years. In addition, all the undergraduate students have provision to learn Tamil/ Malayalam/ Hindi/ French as language under part- I. Similarly English is taught in two groups, one for students with greater proficiency in English and other for students in need of basic skills in English language. The unique nature of CBCS is that it permits people with genuine difficulties to break and rejoin within one year; provided they complete atleast two semesters
