School of Health Sciences & Rural Development
The Gandhigram Rural Institute
(Deemed to be University)
Gandhigram – 624 302**

"India lives in its villages"- Mahatma Gandhi

DEPARTMENT OF RURAL DEVELOPMENT [DRD]

About the DRD:

The Department of Rural Development (DRD) is functioning under the School of Health Sciences and Rural Development, Gandhigram Rural Institute (Deemed to be University), Gandhigram. The Centre offers three academic programmes namely M.A. in Rural Development Studies (RDS) and M.Phil and Ph.D under the integrated mode on the same discipline.

M.A. in Rural Development Studies (RDS):

The term "Development" broadly refers to the range of interventions that purport to advance and secure individual and social well-being in a sustainable and equitable manner. Improvement in the quality of life of rural people is the important agenda of rural development programme. Rural development implies both the economic betterment of people as well as greater social transformation. The basic objective of all rural development endeavors have been the welfare of the millions. In order to achieve this, planned attempts have been made to eliminate poverty, ignorance and inequality of opportunities. A wide spectrum of programmes are being undertaken to alleviate rural poverty and ensure improved quality of life for the rural population especially of those living below the poverty line. In the initial phase of planned rural development, the concentration was on sectors of agriculture industry, communication, education and health. The Ministry of Rural Development places importance now on health, education, drinking water, housing and road so that the quality of life in rural areas improves and the fruit of economic reform are shared by all sections of the society.

A forceful engagement with this domain needs trained human resources with varied backgrounds, capacities and interests and an ethical outlook that provide inspiration for development action. The DRD intends to contribute through its educational programmes to the knowledge and practice of rural development in India. It is recognized that development is not a unitary discipline but an integrative field that brings together understandings from the social and behavioral sciences, the humanities, science and technology within a framework of analysis, policy and institutional action.

This above said programme intends to prepare individuals capable of informed and thoughtful development action, empowered with awareness of the complexity, having depth of the discourse on rural development and contributing for policy and action with special reference to the Indian context.

Further, an important feature of the above programme is that it attempts to equip the students with training in skills that they can put to use in any challenging situation either in the field or in the policy sphere. Our students are enabled to make smooth transitions from the world of studentship to the world of trained work.

Board of Studies:

The DRD has its Board of Studies (BoS) consisting of internal and external subject experts. The present syllabus has been evolved in the meeting of BoS held on 09th June 2018. The Academic Council of the Institute granted approval for the syllabus in its meeting held on 13th June, 2018.

Admission Eligibility:

Admission into MA RDS programme is open to those candidates with a bachelor degree from any field of studies. In the said programme, DRD admits 20 students with excellent academic credentials from varying disciplinary backgrounds. These students graduate with social awareness, strong theoretical and analytical skills to make meaningful contributions as employees of local, national and international organizations and business involved in development, as researchers, and analysts and pursue academic paths relevant for grassroots development arena.

Field work:

Education in the field of rural development studies comprises of theoretical components taught in the classroom and field- based education involving integration of the academic aspect and practice. Fieldwork, which is also known as extension/service learning is an integral component of MA RDS curriculum.

Field placement:

The program has a rigorous component of development research with hands-on experience of collecting primary and secondary data and its analysis by the students on the problems they are researching. After the end of fourth semester's final examinations, the students will undergo mandatory internship for a period of 4 weeks. The students will be placed in any Non-Government Organizations of repute for practical orientation. Each student has to submit a report on the basis of the work done during the placement. The marks will be allotted by the organization concerned. On the basis of the report submitted by the students, a viva-voce examination will be conducted by the DRD.

SEMESTER-I					
Sl. No	Course code	Course title	Nature (M/A/E)	No. of credits	No. of hours
1	21DRDP0101	Introduction to Rural Development	Major	3	4

Course outcomes	On completion of the course, students are enabled for
	<p>CO1:Understanding the fundamental of rural organizations and its roles in the process of rural development</p> <p>CO2:Gaining knowledge of Rural organizations settings</p> <p>CO3:Getting conceptual analyzing ideas and procedural structure of the rural organizations in the process of grassroots development</p> <p>CO4:Learning the rural organizational management concept of funding agencies</p> <p>CO5:Grabbing the knowledge on strategic planning of the rural organizations for the rural development</p>

PROJECT MANAGEMENT
(Course code: 21DRDP0208)

Credit: 2+1	Marks: 100	(CFA: 40, ESE 60)
Objectives: On completion of this course, the students will be able to: <ul style="list-style-type: none"> • understand the concepts of project and project management • identify the project opportunities and methods of projects formulation • analyze the feasibility for implementation and evaluation of project 		
Contents		
Unit 1: Introduction to Project Management Meaning, Definition, Objectives of the project, Structure of the project, Features of the project. Life Cycle of Project – Project Selection, Project Planning, Project Implementation, Project Completion and Review. Project Management- Meaning, Definition, Need and importance of Project Management. Problems in managing projects.		
Unit 2: Project Formulation and Appraisal SWOT analysis on various sources for project identification - Feasibility analysis for project preparation Technical Appraisal, Commercial Appraisal, Economic Appraisal, Financial Appraisal, Management Appraisal, Social Cost Benefit analysis and Project risk analysis. Meaning of Project Finance, Sources of Finance and Role of Financial Institutions in Project financing. Cost of the Project, Cost components of the Project, Cost control techniques		
Unit 3: Project Implementation Introduction, Measurement of Risk, Documentation Review, Brainstroming, Root Cause analysis, Checklist Analysis, Delphi Technique, Capital Asset Pricing Model (CAPM), Program Evaluation and Review Technique (PERT). Usage of Computers in Project Management, Project Management Software, Networking Technologies used for Project Management		
Unit 4: Project Monitoring and Evaluation: Need for project monitoring. Indicators of monitoring. Process and outcomes of monitoring. Designing a Monitoring system. Project management information - Terms of reference – Management Information System (MIS). Evaluation Types of evaluation - Internal, External, Self. Process, outcome and Impact evaluation. Approaches to evaluation. Developing indicators – Measuring costs – Evaluating benefits.		
Unit 5: Participatory Monitoring and Evaluation: Need for Participatory Monitoring and Evaluation. Difference between conventional and participatory evaluation. Monitoring and Evaluation Methods and Tools. Designing Participatory Monitoring Systems and Evaluation Framework.		
Learning Outcomes: <ul style="list-style-type: none"> • have knowledge on Project Planning and Methods involved • understand the concept of monitoring and evaluation of projects • Gain skills in monitoring and evaluation of development projects • have skill in application of Participatory Methods in Project Management
