Dear Colleagues and Students,

Human Brilliance is unmatched. India has abundance of it, we are truly an excellent breed and we have lived through several challenges over the centuries but still lead a happy life. We are very flexible and can adjust to any environment.

We shall also emerge out of this crisis by discipline and resolve.

We have to curtail the spread of the virus, this shall decrease the load on the hospitals and the simplest way of doing this is to do micro-planning at every house and external movements outside home has to be judicious and need-based.....kind of SELF LOCKDOWN for 30 days. This would be the BEST SERVICE we shall do to our MOTHER INDIA. If we do this we shall break the chain, decrease hospital admission, Oxygen requirements will be adequate, demand on Remdesivir will become less, critical patients will get more attention and the death rate will come down.

We will all get **VACCINATED** and impose **SELF LOCKDOWN**. The two simple methods and prove to the world **WE CAN**.

VICE-CHANCELLOR
